

PHAN HONG QUAN

Frontend Engineer (React Native / Next.js / TypeScript)

Ho Chi Minh City, Vietnam

Phone: +84 979 955 925

Email: qphanquan1998@gmail.com

Portfolio: <https://eboost.vn>

PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building production-grade mobile and web products.

Specialized in React Native and Next.js with strong delivery capability across EV charging, mobility, e-commerce, and internal CMS domains.

Experienced in end-to-end frontend lifecycle: feature delivery, integration, debugging, optimization, and release support.

CORE SKILLS

Frontend & Mobile: React Native CLI, Next.js (App Router), React, TypeScript, JavaScript, React Navigation.

State & Data: Redux Toolkit, Redux Saga, React Query, MobX, REST API integration

Infra & Integrations: Firebase, Notifee, MQTT, maps/location APIs, AppCenter CodePush.

UI/Design System: Ant Design, reusable component architecture, responsive and scalable UI modules.

PROFESSIONAL EXPERIENCE

EB00ST (EVMOBILITY) | Frontend Engineer | Aug 2024 - Present | Ho Chi Minh City
Scope:

- Worked across 2 main products: EB00ST Charging Network App (mobile) and EB00ST CMS/Admin Portal (web).

Responsibilities:

- Built EV charging app flows: station map, QR scan, outlet details, charging sessions, wallet top-up, transaction history.

- Implemented notification and real-time-related updates for charging status and account activities.

- Developed CMS modules for operations, marketing, partnerships, and technical monitoring teams.

- Improved release stability by fixing production issues and standardizing feature rollout workflows.

Tech stack:

- React Native, Next.js, TypeScript, React Query, Ant Design, Firebase, MQTT, REST APIs.

FREELANCE (KINIS.AI) | Frontend Developer | Oct 2024 - Feb 2025 | Remote
Scope:

- Delivered growth-oriented web platform and internal contact management capabilities.

Responsibilities:

- Built key pages: Home, About, Technology, Partnership, Investors.

- Implemented investor/partnership/subscriber lead capture workflows.

- Developed admin login and contact management dashboard for internal follow-up.

- Integrated chatbot-style web support interaction via backend API.

Tech stack:

- Next.js, TypeScript, TailwindCSS, Ant Design, React Query, JWT, Mongoose.

IMS SOLUTION | Mobile App Developer | Mar 2022 - Aug 2024 | Ho Chi Minh City
Scope:

- Contributed to 8 production apps across ride-hailing, delivery, e-commerce, membership, marketplace, and food-booking.

Responsibilities:

- Built and maintained core mobile flows: authentication/OTP, booking/order, wallet

let/top-up/withdraw, vouchers, support modules.

- Integrated Firebase services, maps/geolocation, push notifications, dynamic/deep links, and payment-related flows.

- Owned delivery lifecycle tasks: feature development, bug fixing, performance tuning, and OTA release support.

Tech stack:

- React Native, TypeScript, JavaScript, Redux Toolkit/Saga, Firebase, Maps API, AppCenter CodePush.

DETAILED PROJECT HIGHLIGHTS

1) EBOOST Charging Network App (Mobile) | Role: Frontend Engineer

Project scope:

- Consumer EV charging app for station discovery, charging control, wallet operations, and transaction tracking.

Key contributions:

- Implemented full charging flow: QR scan -> connector selection -> charging control -> billing.

- Delivered wallet and payment-related screens with transaction history.

- Built user account utilities including referral and profile-related modules.

Tech:

- React Native CLI, TypeScript, React Query, Firebase, MQTT, Notifee.

Link:

- <https://onelink.to/2uejj5>

2) EBOOST CMS / Admin Portal (Web) | Role: Frontend Engineer

Project scope:

- Internal CMS for EV ecosystem operations and business workflows.

Key contributions:

- Built admin modules for operations, marketing, partnerships, and technical teams.

- Delivered dashboards/tables for transactions, chargers, tariffs, and realtime statuses.

- Implemented reusable component patterns with Ant Design for scalable delivery.

Tech:

- Next.js, TypeScript, React Query, Ant Design, Chart.js, Mapbox.

Link:

- <https://cms.eboost.vn>

3) Kinis.ai Platform (Freelance) | Role: Frontend Developer

Project scope:

- Landing + investor/partnership conversion + admin contact management.

Key contributions:

- Developed growth storytelling pages and responsive UI.

- Built lead pipeline (contact capture and internal admin processing).

- Integrated API-connected support interaction flow.

Tech:

- Next.js, TypeScript, TailwindCSS, Ant Design, React Query.

Link:

- <https://kinis.ai>

4) IMS Product Suite (8 Apps) | Role: Mobile App Developer

Projects:

- SKY, SkyDriver, RPM, Carta, e-Member, MAIC, Hong Phuc, BookGrab/GoGo.

Key contributions:

- Implemented and maintained high-volume consumer and driver workflows.

- Delivered wallet/payment/order/booking/support modules across multiple product domains.

- Supported production releases and OTA patching in active user environments.
