

# PHAN HONG QUAN

Frontend Engineer focused on React Native and Next.js product delivery, with hands-on experience across EV Charging, Mobility, E-commerce, and Operations Platforms.

Ho Chi Minh City, Vietnam +84 979 955 925 qphanquan1998@gmail.com Portfolio: cv-dev-portfolio.vercel.app  
Open to Frontend Engineer / Mobile Engineer roles

## EXECUTIVE SUMMARY

4+ years building and scaling production frontend systems. Strong in implementing complex user flows, integrating third-party services, and maintaining release quality in active product environments.

## CAREER SNAPSHOT

11+

Delivered products (mobile + web)

8

Apps delivered in IMS product suite

3

Main company/freelance groups

4+

Years of frontend product experience

## CORE STACK

- Mobile**  
React Native CLI, TypeScript, React Navigation, Redux Toolkit/Saga, React Query, Firebase, Notifee, MQTT, AppCenter CodePush.
- Web**  
Next.js (App Router), React, TypeScript, Ant Design, Chart.js, Mapbox, reusable component architecture.
- Engineering**  
REST API integration, performance optimization, production debugging, release support, feature standardization.

## EDUCATION & TRAINING

- FPT Polytechnic**  
Mobile Java Android · Mar 2020 - Jun 2022
- CyberSoft Academy**  
Frontend Website · Oct 2020 - Jun 2021
- CodeStar Academy**  
DevOps on AWS · Aug 2022 - Oct 2022

## PROFESSIONAL EXPERIENCE

**Eboost (EVMobility)**  
Frontend Engineer

Aug 2024 - Present

- Owned frontend delivery for EBOOST Charging Network App (mobile) and EBOOST CMS/Admin Portal (web).
- Built EV charging app flows: map discovery, QR scan, outlet details, charging sessions, wallet top-up, transaction history.
- Developed CMS modules for operations, marketing, partnerships, and technical monitoring workflows.
- Improved release reliability through production issue fixes and rollout standardization.

**Freelance - Kinis.ai**  
Frontend Developer

Oct 2024 - Feb 2025

- Delivered growth-focused web platform: Home, About, Technology, Partnership, Investors pages.
- Implemented lead capture/processing workflows for investor and partnership funnels.
- Developed admin contact management dashboard and API-connected support interactions.
- Contributed across broader Kinis ecosystem (web, mobile, backend, dashboard).

**IMS Solution**  
Mobile App Developer

Mar 2022 - Aug 2024

- Developed and maintained 8 production apps: SKY, SkyDriver, RPM, Carta, e-Member, Hong Phuc.
- Built key modules across booking, order, wallet, payment, voucher, and support workflows.
- Integrated Firebase, maps/geolocation, deep links, notifications, and payment-related features.
- Supported full release lifecycle: features, bug fixing, optimization, and OTA updates.

**Gcalls**  
Full-Stack Developer (Intern)

Jun 2021 - Oct 2021

- Built and tested backend/frontend services (React PWA, NodeJS, MongoDB).
- Managed MongoDB data flow and API integration for deployment support.

PROJECT DETAILS BY COMPANY (RECRUITER REVIEW)

EBOOST Charging Network App

2024 - Present

Role: Frontend Engineer · Company: Eboost

Consumer EV charging app for station discovery, QR charging control, wallet operations, and transaction history.

- Implemented QR scan -> connector selection -> charging session -> billing workflow.
- Built top-up, payment history, and realtime charging status interactions.

Tech: React Native, TypeScript, React Query, Firebase, MQTT, Notifee.

<https://onelink.to/2uejj5>

EBOOST CMS / Admin Portal

2024 - Present

Role: Frontend Engineer · Company: Eboost

Internal CMS platform for operations, marketing, partnerships, asset management, and technical monitoring.

- Built modules for accounts, transactions, charging assets, promotions, and dashboard analytics.
- Developed reusable component patterns to accelerate feature delivery cycles.

Tech: Next.js, TypeScript, React Query, Ant Design, Chart.js, Mapbox.

<https://cms.eboost.vn>

Kinis.ai Platform (Freelance)

Oct 2024 - Feb 2025

Role: Frontend Developer · Client: Kinis.ai

Growth-focused website and lead pipeline platform for partnership and investor conversion.

- Delivered public pages (Home/About/Technology/Partnership/Investors) with conversion-oriented UX.
- Implemented lead capture/categorization and admin processing workflow.

Tech: Next.js, TypeScript, TailwindCSS, Ant Design, React Query.

<https://kinis.ai>

SKY Super App

2022 - 2024

Role: Mobile App Developer · Company: IMS Solution

Multi-service consumer app covering ride booking, delivery, food, shopping, wallet, and membership.

- Built booking, delivery, profile, and wallet flows in core user journeys.
- Implemented top-up/payment history plus push-notification and deep-link flows.

Tech: React Native, TypeScript, Redux Toolkit, Firebase, Notifee.

<https://skycorp.vn>

Carta

2022 - 2024

Role: Mobile App Developer · Company: IMS Solution

Marketplace mobile app with shopping, promotions, order lifecycle, and multilingual user support.

- Built commerce flow: category, product detail, cart, payment, and order tracking.
- Implemented flash-sale vouchers and support-center experiences for end users.

Tech: React Native, JavaScript/TypeScript, Redux, Firebase, i18next.
