PROFESSIONAL EXPERIENCE

Eboost (EVMobility)
Frontend Engineer

Aug 2024 - Present

- Owned delivery for EBOOST Charging Network App (mobile) and EBOOST CMS/Admin Portal (web).
- Built EV charging app flows: map discovery, QR scan, outlet details, charging sessions, wallet top-up, transaction history.
- Single-handedly delivered the main Ant Design-based CMS dashboard and modules for analytics, operations support, promotion strategy, app notifications, and partner report emails.
- Built charging-location/station status management with realtime session monitoring and remote issue handling workflows.
- Improved release reliability through production issue fixes and rollout standardization.

Freelance - Kinis.ai
Frontend Developer

Oct 2024 - Feb 2025

- Delivered growth-focused web platform: Home, About, Technology, Partnership, Investors pages.
- Implemented lead capture/processing workflows for investor and partnership funnels.
- Developed admin contact management dashboard and API-connected support interactions.
- Contributed across broader Kinis ecosystem (web, mobile, backend, dashboard).

IMS Solution
Mobile App Developer

Mar 2022 - Aug 2024

- Developed and maintained 6 production apps: S-Go (SEE), SKY, RPM, Carta, e-Member, and Clear Fast (Hong Phuc).
- Built key modules across ride/food/order flows, merchant onboarding, wallet/payment, voucher, and support workflows.
- Integrated Firebase, Goong map/geolocation, deep links, notifications, and payment-related features.
- Supported full release lifecycle: features, bug fixing, optimization, and OTA updates.

Gcalls
Full-Stack Developer (Intern)

Jun 2021 - Oct 2021

- Built and tested backend/frontend services (React PWA, NodeJS, MongoDB).
- Managed MongoDB data flow and API integration for deployment support.

PROJECT HIGHLIGHTS

EBOOST Charging Network App

2024 - Present

Role: Frontend Engineer · Company: Eboost

Consumer EV charging app for station discovery, QR charging control, wallet operations, and transaction history.

- Implemented QR scan -> connector selection -> charging session -> billing workflow.
- Built top-up, payment history, and realtime charging status interactions.

Tech: React Native, TypeScript, MobX, MobX-State-Tree, React Query, Firebase, MQTT, Notifee.
<https://onelink.to/2uejj5>

EBOOST CMS / Admin Portal

2024 - Present

Role: Frontend Engineer · Company: Eboost

Internal CMS platform for analytics, operations support, promotions, partner reporting, and charging network monitoring.

- Single frontend owner: delivered app notifications, partner report emails, and campaign management workflows.
- Built realtime charging session monitoring, charging-location status pages, and remote station issue handling flows.

Tech: Next.js, TypeScript, React Query, Ant Design, Chart.js, Mapbox.
<https://cms.eboost.vn>

Kinis.ai Platform (Freelance)

Oct 2024 - Feb 2025

Role: Frontend Developer · Client: Kinis.ai

Growth-focused website and lead pipeline platform for partnership and investor conversion.

- Delivered public pages (Home/About/Technology/Partnership/Investors) with conversion-oriented UX.
- Implemented lead capture/categorization and admin processing workflow.

Tech: Next.js, TypeScript, TailwindCSS, Ant Design, React Query.
<https://kinis.ai>

GC Flow Admin

2026 - Present

Role: Full-Stack Developer · Personal Business Project

Internal admin platform for personal business operations: price profiles, order approval, seller/customer management, and profit analytics.

- First 100% API-first project; delivered MVP in 3 days from API integration to UI workflows.
- Implemented customer self-order via public link, admin approval flow, and revenue/profit reporting dashboard.

Tech: Next.js, TypeScript, Ant Design, MongoDB, Mongoose, Chart.js, next-intl.
Private project · Demo on request

CV Dev Portfolio Website

2026 - Present

Role: Frontend Engineer · Personal Project

Personal portfolio website to present projects by company with bilingual content, gallery-first storytelling, and recruiter-focused contact flow.

- Built project showcase by company with modal image viewer, slide navigation, and QR per project link.
- Implemented next-intl (VI/EN), responsive PWA behavior, and integrated downloadable executive CV experience.

Tech: Next.js, TypeScript, next-intl, Framer Motion, qrcode.react, Tailwind CSS.
<https://cv-dev-portfolio.vercel.app>

S-Go (SEE) Super App

2022 - 2024

Role: Mobile App Developer · Company: IMS Solution

All-in-one mobility and commerce app; focused contribution on Food Delivery and merchant operations.

- Owned food ordering flow: discovery -> menu -> cart -> order -> live status updates.
- Built merchant onboarding and product management for interactions between customer, driver, and restaurant.

Tech: React Native, TypeScript, Redux Toolkit, Firebase, Notifee, Goong Map API.
<https://skycorp.vn>

SKY

2022 - 2024

Role: Mobile App Developer · Company: IMS Solution

Multi-service app for ride-hailing, food delivery, shopping, and logistics in one consumer experience.

- Built end-to-end user journeys for ride booking, service ordering, payment, and realtime order/trip tracking.
- Implemented location-based flows, push notifications, and release-stability fixes on iOS and Android.

Tech: React Native, TypeScript, Redux Toolkit, Firebase, Notifee, Goong Map API.
<https://skycorp.vn>

Carta

2022 - 2024

Role: Mobile App Developer · Company: IMS Solution

Marketplace mobile app with shopping, promotions, flash-sale campaigns, order lifecycle, and multilingual support.

- Implemented product discovery, cart/checkout, payment, and order tracking workflows.
- Built promo/voucher flows and customer support interaction within the app.

Tech: React Native, JavaScript/TypeScript, Redux-Saga, Firebase, i18next.
